

## Brainstorming

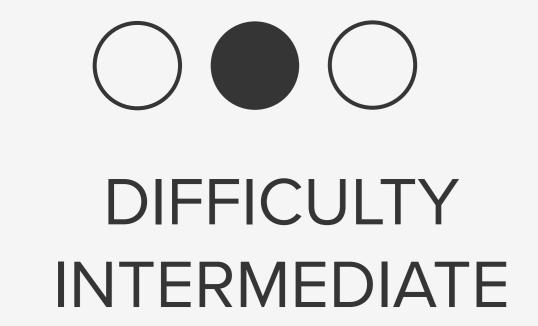

## INTRODUCTION

Swimming is one of the best exercises that helps people to reduce stress in this urban lifestyle.Beginners, especially, often feel it difficult to breathe underwater which causes breathing trouble which in turn causes a drowning accident. Worldwide, drowning produces a higher rate of mortality without

causing injury to children. Children under six of their age are found to be suffering the highest drowning mortality rates

By studying body movement patterns and connecting cameras to artificial intelligence (AI) systems we can devise an underwater pool safety system that reduces the risk of drowning.
